Physical tensor magnitudes: $\Sigma_0 = 0.004$, $\Pi_0 = 0.001$ corners + isotropic control
Collisionless LRS, half-contraction norm; no native H/He feedback
1e−3
$\Sigma(\bar{z})$
Mean redshift $\bar{z}$
isotropic control
$\varepsilon_\sigma = +1, \varepsilon_\pi = +1$
$\varepsilon_\sigma = +1, \varepsilon_\pi = -1$
$\varepsilon_\sigma = -1, \varepsilon_\pi = +1$
$\varepsilon_\sigma = -1, \varepsilon_\pi = -1$
1e−3
$\Pi(\bar{z})$
Mean redshift $\bar{z}$
