Finite diagnostics and three selected combined controls
Algebraic precision and sampled positivity are separate from convergence claims
257-angle sampled brightness minimum
Brightness / initial monopole
Computed case index
Maximum conserved-number relative drift
Computed case index
Conditional isotope sum residual
Computed case index
L16 vs L24 + tighter tolerance
Combined check 1
Combined check 2
Combined check 3
Fixed 2e-5 criterion
signed S_F
P_m
P_r
charge f
