New matched semi-relativistic family: f_m=0.3, m/Tref=3: ionic census and conditional T/n versus elapsed_time
Inherited atomic ions; T/n all-bare instant-thermalized passive totals, no T charge projection
Auxiliary axis uses reference clock: strongPiM_m3_f0.3_Pi0_L16; other cases have different z(t).

n: nuclear total only

H1: saved ionic census Y_q

D: saved ionic census Y_q

T: nuclear total only

He3: saved ionic census Y_q

He4: saved ionic census Y_q

Li6: saved ionic census Y_q

Li7: saved ionic census Y_q

Reference redshift z

Proper elapsed time since z=20 (Myr)

Y = n_species/n_B (log scale)

Y_Aq = n_Aq/n_B (log scale)

Initial n=0; old n_0 hard-zero

Initial T=0; T charge states unresolved; old T_0/T_1 hard-zero

Saved-model exact zero: charge 2, 3

hot Π_{m0}=0 (L16)
