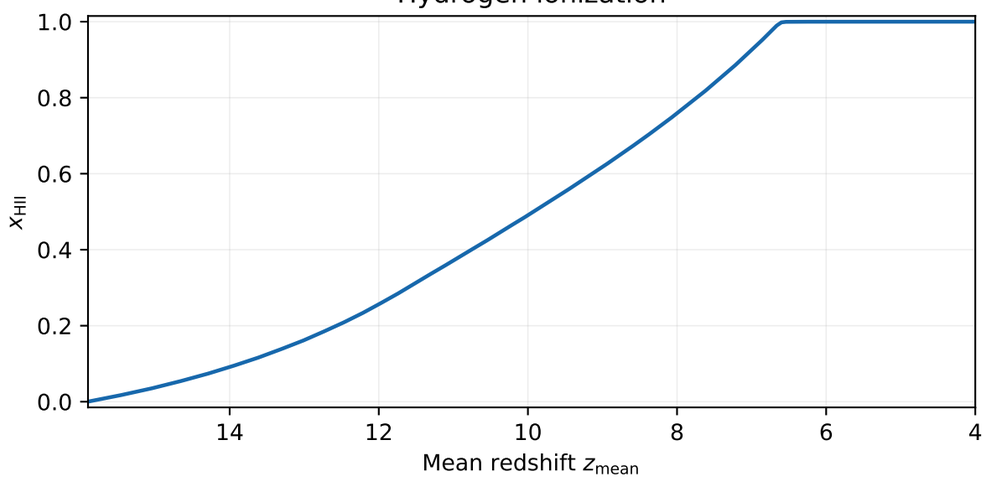
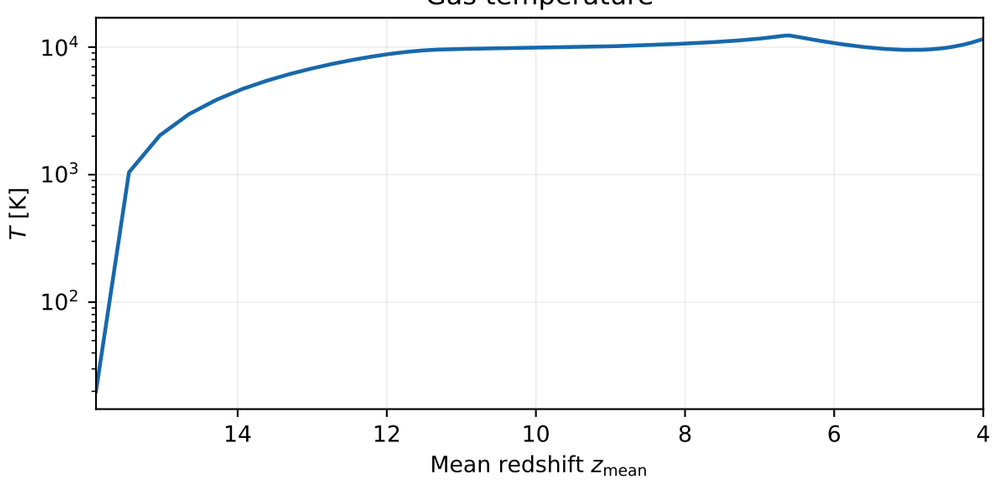
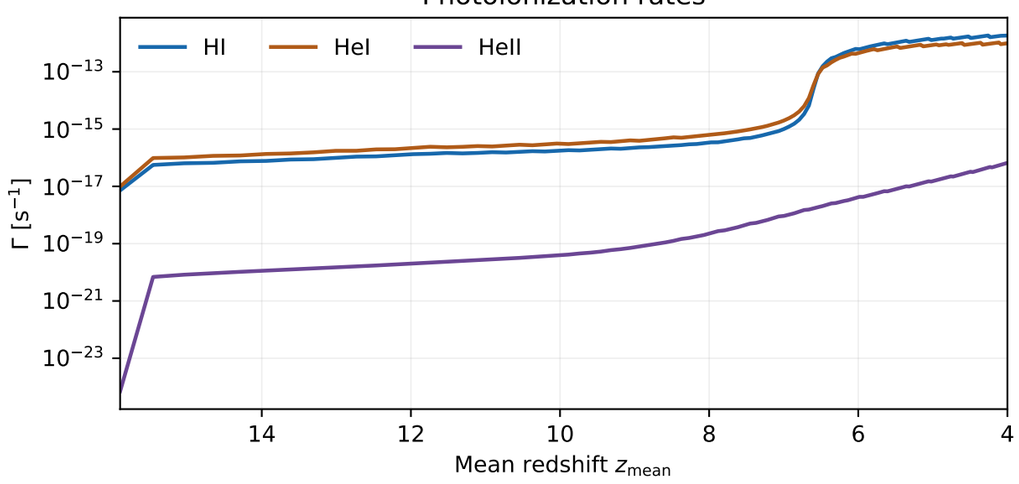
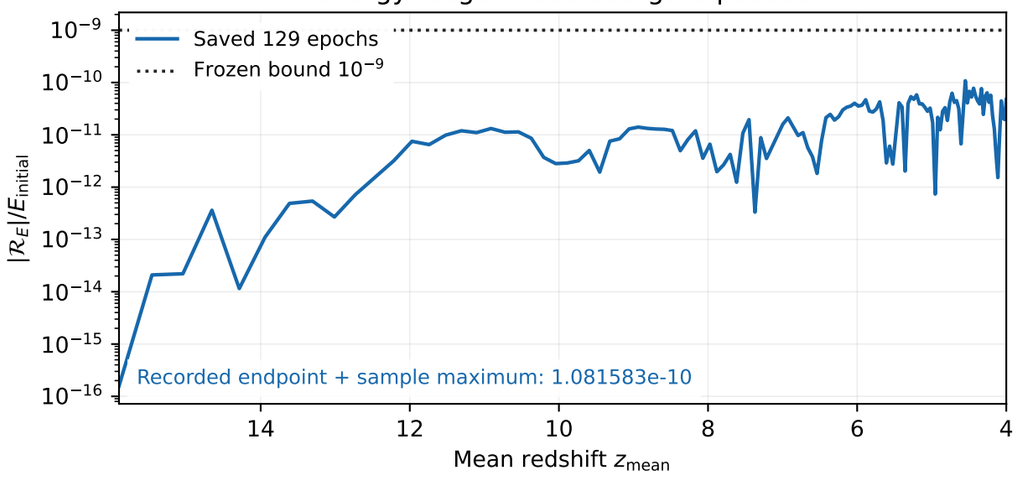
FULL-INTERVAL NUMERICAL DIAGNOSTIC — REJECTED: PHOTON-NUMBER LEDGER

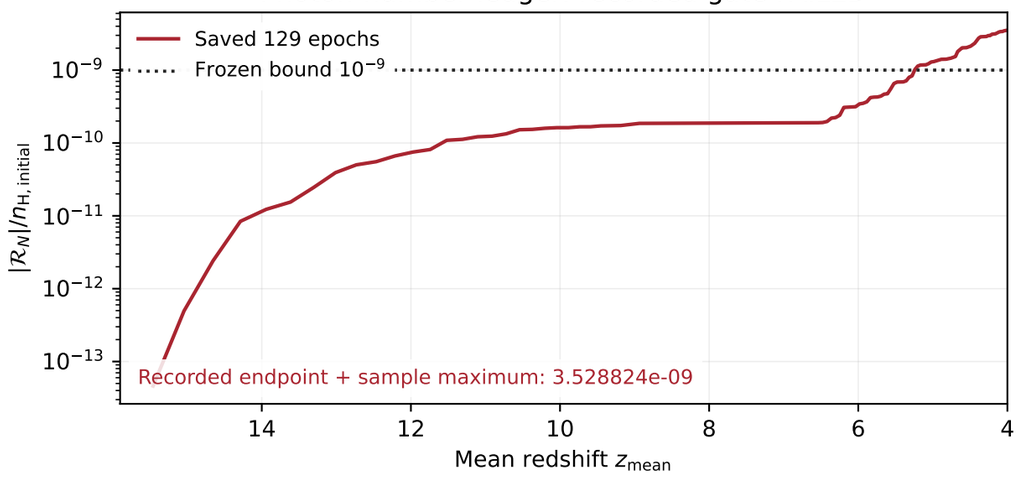
GAUSS1_FINE | 384 energy × 2 angular nodes | Spectral/time acceptance unavailable | Scientific admission: false











Restored saved history only: common proper-time epochs span mean z = 15.9 → 4. Mean redshift is a background scale-factor coordinate, not observer redshift.
Conditional FLRW HM12 primary-only Case A H/He, source band 10–50000 eV, prescribed isotropic CMB bath. No CR/RCT, Bianchi signal or BASS visibility admission.
Curves display recorded data; exact zeros are omitted only on logarithmic axes. No new physical solution or convergence certificate is produced.
